1. GOAL

Design a **Technology Partner / Solutions Hub Page** and **card-based keyword pages** for KR Customizer on kusheldigi.com. The design should be ready-to-implement for developers.

2. HUB PAGE (Technology Partner)

Page Name:

KR Customizer – Technology Partner

URL:

`https://kusheldigi.com/technology-partners/kr-customizer`

Hero Section:

- Background image: 3D product customization concept
- Headline: "KR Customizer – 3D Product Configurator Partner"
- Subheadline: "Advanced 3D Product Configurator for Shopify & Print on Demand Brands"
- CTA button: "Book Free Demo" → link to krcustomizer.com/demo

Short Intro Content:

- 300–400 words (briefly describe KR Customizer, 3D configurator, and its benefits)
- Highlight: "Powered by KR Customizer" in bold

Cards / Boxes Section:

- **4 Cards**:
- 3D Product Configurator
- Shopify Product Customization
- Print on Demand Configurator
- Custom Product Builder
- Each card:
- Icon / illustration
- Title
- 1 line description
- Clickable → navigates to dedicated keyword page

CTA Section:

- Large clear button: "Book Free Demo" → krcustomizer.com
- Optional testimonial / mini-case study below

---

3. CARD / BOX BASED KEYWORD PAGES

Example URLs:

- kusheldigi.com/solutions/3d-product-configurator
- kusheldigi.com/solutions/shopify-product-configurator
- kusheldigi.com/solutions/print-on-demand-configurator
- kusheldigi.com/solutions/custom-product-configurator-software

Page Layout:

1. Hero section: Page title + brief one-line intro
2. Problem statement (short paragraph)
3. Solution explanation (how KR Customizer solves it)
4. Features (bullet or icon section)
5. Use cases / applications (short paragraphs)
6. CTA button linking to KR Customizer demo page

UI/UX Requirements:

- Consistent header/footer from hub page
- Breadcrumb navigation
- Responsive design (mobile, tablet, desktop)
- Clear hierarchy and whitespace for readability
- CTA button visible without scrolling (above fold)
- Card hover effects / clickable interaction
- Typography: Clean and modern (e.g., Sans Serif)
- Color scheme: Match kusheldigi.com brand palette

---

4. INTERNAL LINKING / ANCHORS

- Hub page → keyword pages (cards clickable)
- Keyword pages → KR Customizer (2–3 contextual links per page)
- Anchor examples:
- "3D Product Configurator by KR Customizer"
- "Advanced Shopify Product Customization Software"
- Avoid generic anchors like "click here"

---

5. CONTENT NOTES FOR DESIGNER

- Use placeholder text for paragraphs (Lorem Ipsum or short descriptive text)
- Highlight brand mentions (KR Customizer) in bold
- Cards must have icon + title + description + link
- Hero section must include CTA
- Ensure accessibility (contrast, readable fonts, alt text for images)

---

6. FINAL OUTPUT EXPECTATION

- Designer can **create full UI mockup / Figma / Adobe XD** based on this guide
- Ready for developer handoff with clear CTA, cards, hero, and content sections
- UX flows: Hub page → Card click → Keyword page → CTA → KR Customizer demo
